4/13/69

Dear John,

Prior to completion of the analysis of the government's papers in your suit, there is one point I should raise.

They refuse you access to the bullet on the ground that letting anyone handle it would endanger irreplaceable evidence, etc., and that it is also "precluded".

I have handled it.

I know of one case where it was handled and "scientific" tests were made with it or the fragments or both.

If this interests your lawyer and you and/or he would like, I will carry it further for you.

Sincerely,
